Hikvision Visual Tracking Solution
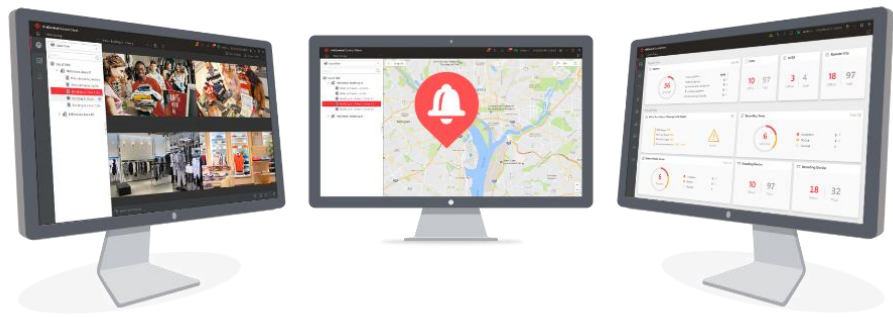

Pain Points

Low efficiency by manually searching and switching from one camera to the adjacent camera to track the suspect.

Complicated and abundant operations especially when navigating numerous cameras.

Product Showcase

◆ **HikCentral Management Software V1.5**

- Visual tracking configuration
- Visual tracking view, recording, export and playback
- Each monitoring spot can be added with up to 8 adjacent cameras for visual tracking

HIKVISION®

Solution Highlights

Establish connections between cameras

Easily switch from current camera to the next by clicking the virtual icon on video to track target

Record and export an entire tracking video of the target for playback

Solution Values

Simplify complicated and long search and live view operations

Enhance efficiency in following suspects during high-alert situations

Save time and streamline important investigations
